

Personnel Monitoring

SOLUTION BRIEF PERSONNEL MONITORING

Personnel Visibility at Entry and Exit Points and Location Within Controlled Zones

The Intellex RFID solution for personnel monitoring provides visibility to individuals entering and exiting restricted areas, their location within controlled zones, and their location history. Proper personnel monitoring is vital to ensuring a successful and safe operation. Excellent customer service requires the monitoring of hospitality employees to ensure that proper service levels are met.

Do You Need A Better Solution To Monitor Personnel Movement In Large Areas?

While building access is typically controlled via close-range badge systems through doorways, once in, the movement of individuals is often unmonitored. In large open environments, personnel location sometimes needs to be monitored to prevent unwanted wandering and loitering. Close-range badge systems also

Monitor crowds at large events.

lack the ability to track multiple people at the same time and there is no way to automatically detect if additional people enter the zone using a single person's badge to open the door.

In addition, situations that call for the removal of property by personnel may need to be tracked to ensure the right person is leaving with the right equipment or vehicle.

Link personnel to asset movement.

Do You Need To Track Individuals for Safety and Accountability?

The monitoring of personnel in potentially hazardous environments or situations is paramount to ensuring safety and avoiding company liability. Evacuation situations often call for the immediate accounting of personnel to ensure personal safety.

Track individual's location to ensure personal safety.

Do You Maximize Your Level Of Customer Service?

From retail centers to cruise ships, increasing customer satisfaction through hospitality is the key to a profitable business. Companies need to ensure employees are providing the proper coverage and responding to customer needs before customer satisfaction issues arise.

Increase employee productivity and maximize VIP customer satisfaction.

Your Complete Solution To Improved Personnel Monitoring

The Intellex RFID solution for personnel monitoring is a complete package for detecting and tracking employees, 3rd parties, and customers. You can add security for people and assets easily, and set up security zones for automated tracking. The solution can also integrate with existing security systems to alert when unauthorized persons or assets enter the zone and can work with motion detection for full enforcement for persons without an ID.

Personnel Monitoring

People wearing Intellex RFID badge tags will be tracked automatically as they enter and exit large entryways and as they move within controlled areas. Intellex readers located at key entry and exit points and at locations within the zone provide instant visibility as individuals enter and leave the area, as well as their location within in a large area.

In addition, Intellex badge tags have on-board memory so you can store information about the person such as name, a photograph, biometrics, and where they've been, etc.

Getting Started Quickly

The Intellex RFID solution is not the typical "heavy" system offered by some vendors. It is designed to let you get started quickly and easily so you can conduct a production pilot before investing further. The Intellex RFID solution is designed to integrate with your existing applications and systems, or be used standalone without the need for complex back-end systems. Flexible application options make it simple for your users and operators to use the system.

Intellex RFID Platform Features

- Standards-based infrastructure
- Multiple form factor RFID tags
- Extended range and reliability
- On-tag memory with security
- Easy to get started
